

BUMPER BLADES

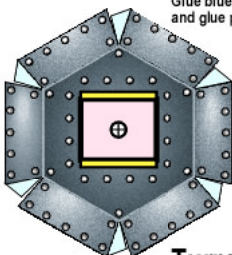

Cut out completely and glue to the center of each bumper blade.

BATTLE CAR WEAPONS

Turret topper

Glue blue tabs, fold in and glue pink tabs to turret.

Turret

Be sure to cut out **YELLOW** slots on Turret.

MMiP #40, BATTLE CARS, weapons
Score red lines before cutting out. See the **SCORING** guide graphic for the lines to score on the Turret and Missile Launcher parts.

The Turret uses a **ROUND TOOTHPICK** that goes though the small cross hair holes in the body. Cut only the cross hair lines. This will provide some resistance for the toothpick, and keep the turret from spinning around freely.

The flat weapons are designed to fit into the standard slots on the car body. be sure to test fit the weapons to be sure the tabs and slots all fit together. You can optionally glue the weapons in place, but they are designed to be removable. The Missile Launchers are designed to fit in the weapon slots as well, and are designed to fit on either side of the car, note the four white highlighted circles are the front of the Missile Launcher.

These are just the first batch of weapons. Look for more weapons and cars in the **MMiP #41** Category at ONEMONK.COM
